families, creating an atmosphere of community in an accessible way

The urban renewal project for the city aims to provide an opportunity for transformation and innovation, focused on improving the quality of life for its residents through careful reorganization and expansion of several neighborhoods. The intervention prioritizes the creation of new functional and sustainable spaces, with particular attention to mobility, social well-being, and the environment.

 Central to the project is the introduction of *new healthcare and educational facilities*, which are essential for ensuring that residents have better and more efficient access to vital services, while also securing a prosperous future for generations to come, promoting

- healthy and sustainable growth.
- The project also includes the development of *new urban parks* and the creation of green streets, designed to encourage sustainable mobility and the physical and mental well-being of the community, providing places for socializing and community engagement.

Overall, the goal of the project is to renew the city in a harmonious way, creating a more livable, ecological, and accessible environment, thus addressing the urban challenges of the future with innovative and sustainable solutions.
