

# CHANDIGARH 2050

This area is located close to the city center and requires greater density as well as a mix of use cases. The larger buildings on the edges of the neighborhood shield it from the noise and stressful environment of the main roads. The front parts of these buildings are designed with lower floors housing local stores, medical offices, community centers, and other essential services, ensuring everything is accessible on foot. These front sections also protect the privacy of the rear housing units, which blend seamlessly into the nature-focused surroundings featuring well-maintained green spaces. These parks and open areas enhance air quality and provide residents with spaces for leisure and recreation.

The area is well-connected to the city's metro system through efficient bus services, offering a seamless transit experience and reducing reliance on private vehicles. This connectivity ensures easy access to employment hubs and other key parts of the city, fostering a more sustainable and inclusive transport network.

Co-living housing models are strongly emphasized here to accommodate the growing population migrating to Chandigarh for its economic advantages. This model not only makes housing more affordable but also encourages social interaction and a sense of community among residents. Furthermore, the growing trend of remote work and home offices is addressed by ensuring that living spaces are designed with adequate size and flexibility to support modern lifestyles.

The area also celebrates Chandigarh's cultural diversity, creating a vibrant and inclusive atmosphere. Local events, markets, and cultural hubs are encouraged, providing spaces for the community to gather and share their traditions. This cultural mix enriches the neighborhood, making it a unique and appealing place to live.

Additionally, with two schools located nearby, the area is ideal for families seeking convenience and quality education. The combination of green spaces, strong connectivity, affordable and flexible housing, and a rich cultural mix ensures that the area becomes a thriving, sustainable, and inclusive urban community.
