

**UTOPIA-** DREAMING A FUTURE AND NECESSARY REALITY. THE UTOPIAN VISION

# SYMBIO

**SYMBIO-** is a city that develops in complete harmony with nature. Building are covered with vegetation, and organic materials support the environment. Technologies serve nature, aiding in its regeneration, and energy comes exclusively from renewable sources.

The city addresses environmental degradation by minimizing human impact on nature. The community operates in accordance with permaculture principles, where waste is transformed into resources, and all human activities enhance acosystem

„SYMBIO critiques modern cities for their exploitative relationship with nature. Instead of viewing nature as a resource, it proposed an alternative where technological development serves the environment
